

Emre Ertürk

Software engineering contractor | 10 years of professional software experience | KodDelta

Istanbul, Türkiye (UTC+3) | emre@koddelta.com | +90 544 535 56 10

Portfolio: <https://koddelta.com/en>

Experience and availability

10 years of professional software development experience. Available 20-40 hours per week for contract work. English discussions and interviews are possible. These facts were confirmed by Emre on 12 October 2026; the total does not claim 10 years in each listed technology. Detailed prior employers, dates and references can be supplied separately.

Current work

Owner and technical contact for KodDelta, a Türkiye-based sole proprietorship in Istanbul. I coordinate scoping and remote software delivery for business applications, web interfaces, portals, integrations and AI-assisted workflows. Contracting and invoicing use the business; the exact legal invoice name is supplied during contracting.

Engineering scope

React, Next.js, TypeScript, Astro, Node.js and PostgreSQL. Responsive interfaces, CRM workflows, API integrations, role-based business applications and operational dashboards. AI-assisted development with reviewable changes, repository checks and human approval for consequential actions.

Selected work for my own business

KodDelta website and sales operations: a published bilingual site at koddelta.com, with service pages, structured content, portfolio illustrations and CRM/contact workflows. This is work for my own brand, developed with AI coding assistance; it is not a third-party client endorsement. The maintained website and business-software repositories provide technical work samples. ERP work in development is not represented as a completed customer delivery.

Proposed contract engagement

Begin with one defined frontend feature, portal workflow or integration. Agree acceptance checks, repository access and commercial terms before implementation. Provide reviewable source changes, written progress and Google Meet discussions. Weekly capacity is 20-40 hours. Specific time-zone overlap, start date, rates and deliverables are agreed for each engagement.

Profile scope

The professional experience total, weekly capacity and English interview ability are owner-confirmed. This profile does not invent prior employer names, employment dates, education, certifications, technology-specific experience totals or customer results. Current KodDelta samples are described separately from the wider career history.
